ABOUT US

1998 - ESTABLISHMENT

In 1998, Kovix began its operations with a dedication to providing high-quality locks that are resistant to attacks and common thefts.

2000 - A NEW PATH OF INNOVATION

Innovation is at the core of Kovix, which not only defines our brand but also shapes our esteemed reputation among our valued customers. In order to enhance our security technologies, we have assembled a team of excellent engineers and established our first Research and Development (R&D) department in 2000.

2004 - VENTURING INTO THE GLOBAL MARKET

Acknowledging the vast potential within the global market, we have strongly believed in our ability to deliver outstanding value to customers worldwide. In 2004, our presence garnered highly positive feedback, motivating us to extend our core principles and offerings beyond local riders.

WHO GONNA TELL THE QUALITY?

As customers' expectations for quality continue to rise, security certificates serve as a testament to the quality of our products.

2021 - PIONEERING THE FIRST ALARM TRAILER COUPLER LOCK

Despite notable advancements in security locks, the theft of valuable outdoor vehicles and equipment continues to be a prevalent issue globally. In response to this ongoing challenge, we introduced the groundbreaking Kovix Outdoor series in 2021. This product line includes a range of Trailer Coupler Locks and Marine Locks. Notably, we take pride in being the first manufacturer to integrate a 120dB alarm with traditional trailer coupler locks, taking their security capabilities to unprecedented levels.

OVERLORD

2022 - NO. WE NEVER STOP TO PROGRESS

In 2022, we introduced the Kovix Overlord series, a new line of disc locks. These locks feature higher visibility and an improved sound outlet, providing louder performance and enhanced security.

2023 - INTRODUCING THE STEEL THUNDER BIKE LOCK SERIES

STEEL THUNDER

In 2023, we proudly present the Steel Thunder Bike Lock Series. This remarkable product line offers a variety of robust security options for cycling enthusiasts. These locks feature an inbuilt 120-decibel alarm, deterring thieves with an ear-piercing sound. To enhance rider confidence, these locks have undergone rigorous testing by independent certification bodies such as the Netherlands ART, French SRA, UK Sold Secure.

A TRUE PROMISE

Throughout the years, our goals have remained unwavering. Kovix is dedicated to delivering high-quality security accessories for outdoor rides. Our steadfast commitment to excellence ensures that our customers can trust in the reliability and effectiveness of our products.

SECURITY CERTIFICATIONS

SRA (SECURITY AND REPAIR OF AUTOMOBILES) is a professional organization established in France in 1977. Part of the SRA's primary mission is to participate in the prevention of vehicle theft. Classe SRA requires a highly detailed drawing of the lock before testing to determine the lock's weakest point. Then, sawing, lever/wedge attack, and drilling tests will be performed to evaluate the security product.

ART Foundation Netherlands promotes security against theft by formulating requirements for mechanical safeguards for two-wheelers. Durability, Weather resistance, Machine, and Manual attack tests are usually performed to testify to the preventive value of a lock. The more stars a lock has, the higher its preventive value and the better it protects against theft. A lock with five stars has the most preventive value.

Sold Secure is the UK's premier testing and certification body for all security products, dedicated to reducing the risk of crime by assessing security products through power tools, machine-based testing, and physical attack testing. Products that have passed a satisfactory evaluation will carry the coveted Sold Secure Approved quality mark.

SP Technical Research Institute Sweden attests to all provisions concerning the assessment and verification of constancy of performance of Mechanically operated locks. Products that fulfill all the prescribed requirements will remain SP accredited as long as the factory production requirements fulfill the harmonized standard used to assess the performance of the declared essential characteristics.

SECURITY RATING

EVERYDAY SAFETY (1-3)

Locks with a security level of 1-3 are suitable for use in low-risk areas and for everyday use in rural areas. They are lightweight, portable, and provide basic safety. Perfect for everyday riders.

MODERATE SAFETY (4-6)

Locks with a security level of 4-6 are suitable for areas with low to medium theft risk and overnight parking in rural areas. They are solid and inbuilt with a 120-decibel siren for added security. Perfect for urban riders.

HIGH SECURITY (7-9)

Locks with a security level of 7-9 are classified as high-security locks. They are effective against physical attacks. They are robust and inbuilt with a 120-decibel siren for added security. Ideal for use in medium to high theft-risk areas, college campuses, or urban areas.

ULTIMATE SECURITY (10-10+)

A security level 10 lock is listed as the highest security class lock. They are effective against physical attacks and virtually indestructible. Accredited by various security certifications for guaranteed quality. Ideal for use in the highest theft-risk areas and overnight in urban areas.

ALARM BOOST

The Alarm Boost feature includes a 120-decibel alarm that can be heard up to 1,500 feet away. The motion sensor detects any tampering or unauthorized movements to the lock, triggering the alarm immediately. Additionally, the lock is equipped with weather resistance features, allowing it to withstand various environmental conditions such as rain, sand, and dust without affecting its reliability.

STEEL THUNDER

Introducing the New STEEL THUNDER Bike Lock Series

The STEEL THUNDER Bike Lock Series is constructed of robust materials such as Stainless Steel and Hardened Steel, providing maximum security and rust resistance for long-lasting protection to cycling enthusiasts. Each lock in the series features an inbuilt 120-decibel alarm to deter thieves with an ear-piercing siren. Combined with the IP67 waterproof certification, these locks are designed to withstand harsh weather conditions and keep the bike safe in any environment.

While to further advance rider's confidence, the new series has been designed to meet and exceed the stringent security qualifications set by independent certification bodies. These qualifications include the Netherlands ART, French SRA, UK Sold Secure, and Sweden SP. These certifications are recognized as the highest standards for bike lock security, highlighting the quality and effectiveness of the new series.

Experience a new level of security with the Kovix STEEL THUNDER Series, designed to provide top-level protection to cyclists.

OUR MECHANISM

1. DISC TUMBLER LOCK MECHANISM

Composed of multiple rotating discs, only a specially cut key can turn the discs and allow the lock to open. Discs and keys are uniquely cut into over 15,000 combinations. The mutual opening rate is extremely low.

2. STAINLESS STEEL DISC PLATES

Strong material with resistance to lock picking, drilling and bumping.

3. CARBIDE REINFORCED STEEL LOCKING PIN

The locking pin has passed various tests performed by and is proven to resist bolt cutters and saw blades

4. DOUBLE LOCK MECHANISM

Twin-spar lock chassis for double strength, cut and to resistance.

smart.LOCK

Introducing the Kovix smart lock, a revolutionary security solution that offers both convenience and security. With its advanced features such as keyless unlocking through Bluetooth® 3.0 and fingerprint recognition, this lock redefines the way you secure your beloved bike. The U shackle, made from hardened steel, guarantees exceptional durability and resistance to rust, ensuring long-lasting reliability.

Experience the future of security with the Kovix smart lock – the perfect blend of convenience, durability, and advanced protection.

What sets the Kovix smart lock apart is its inbuilt 120-decibel alarm system. This advanced feature actively detects any movement, effectively deterring tampering and amplifying security. The lock also allows for easy access sharing, making it perfect for scenarios where multiple users need access to the same lock.

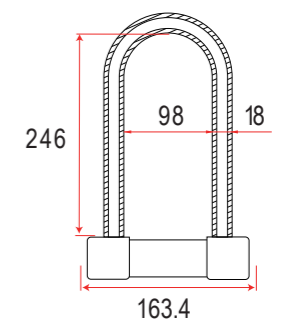

KSC-U2i SMART U LOCK
